

Lost in Time 2026

Temporal Patterns &
Time Series in Medicine

Invitation

Hosts: The Department of Neonatology and Pediatric Intensive Care (UKA) and the Chair of Diagnostic Sensing (Uni-A)

June 10th, 2026

Location: IHK Schwaben Augsburg, Bartholomäus-Welser-Raum, Stettenstraße 1+3, 86150 Augsburg

Registration: Space is limited, so please register by submitting the completed form to info@lost-in-time.me

Cost & Catering: Participation is free of charge, thanks to the support of the B. Braun Foundation. Catering (coffee, snacks, and drinks) will be provided.

Lost in Time is a networking event aimed at all researchers in Augsburg working with time-dependent data, including:

- Physiological time series / monitoring data (ICU, OR, ED, wards)
- Wearable or ambulatory sensor data
- Longitudinal patient trajectories (registries, cohorts, EHR-derived)
- Multimodal fusion (signals - lab results - imaging - notes)
- Prediction, decision support, and clinical workflow integration

...if this aligns with your work, this event is for you!

We Need Your Input:

We warmly invite you to participate in our symposium actively. Please feel free to bring a problem, a project, a dataset, or a new method, and let's work together to establish "time" as an interdisciplinary field of research in Augsburg!
