
Core Facility | Augsburg

Immunohistochemistry

Instrumentation:

Immunohistochemistry is performed on modern platforms with full automatization guaranteeing consistent processing conditions. Antibodies used for diagnostics are validated according to DAkKS specifications - DIN EN ISO/IEC 17020.

Platforms:

- 3 Ventana Benchmark Ultra Systems
- 1 Leica Bond RX System
- 1 Sysmex Panoramic Scan II Fluorescence Scanning (for Multiplexing)

Services:

- Routine Immunohistochemical Staining
- In situ Hybridisation
- Multiplexing (Ultivue)
- RNA-Scope

Contact Information:

Facility Location: Institute of Pathology and Molecular Diagnostics
Stenglinstrasse 2
86156 Augsburg
